

EZ Wipe - Saturated with IPA Cleaning Solution

This wipe, saturated with industry-recommended IPA solution, is designed to clean accessible thermal print heads. When used it will:

- Clean the print head of contaminants
- Clean the platen roller
- Clean interior components

How Cleaning Products Work

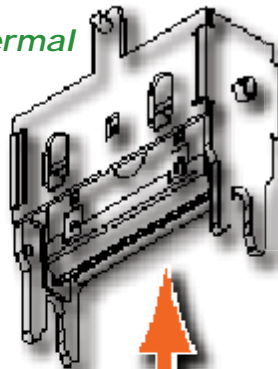

Transaction devices, such as card readers and thermal printers, need to be maintained for performance reliability. Cleaning products safely and easily remove dirt and other contaminants from within these devices without costly outside assistance. Each transaction device requires specific cleaning products to be used as preventive or corrective maintenance.

Use as:

- A scheduled maintenance product to prevent poor printing
- An emergency maintenance product to correct poorly printed material
