

PVC MEMBERSHIP CARD

Our plastic cards is made of solid PVC. We can produce plastic card; produce pvc card; produce vip card; product warranty Coated PVC Overlay. Magnetic Card.

These PVC cards can be used to make: a plastic gift card, a plastic business card, a plastic ID card, a membership card, a loyalty card, a fund raiser card, school ID card, photo ID card, Photo ID Badge, any ID Badge or ID card and even drivers licenses are all printed on plastic PVC cards. Long-lasting and durable, PVC cards have become the industry standard for all ID card programs.

PVC cards come in a variety of sizes. The most common PVC card is the CR-80, which measures 30 millimeters in thickness, and has the same dimensions as your typical credit card. CR-80 cards are compatible with virtually any ID card printer. Other available options include 14 and 10 mil PVC cards or special cut size, adhesive sticky-back back cards, signature panel cards, and oversized CR-100 cards (which typically require a special printer). Depending on the needs of your ID program, you can also use PVC cards with a magnetic stripe or embedded electronics, such as a smart chip, for heightened security and advanced functionality

****GUARANTEE *****

Why print on PVC?

There are a number of reasons. The cards are graphic-quality, with a smooth surface well-suited for today's ID card printing technologies. Images and text come out clear and detailed with vivid colors. The cards hold up well over time, and they can even incorporate advanced security features such as magnetic stripes and smart chips.

Whether you prefer generic PVC cards or cards made from the top ID printer manufacturers including Zebra, Fargo, Evolis and Datacard,
